

HVS Flexi system with a lip seal scraping lid for efficient single drums unloading.

Savings and efficiency

The HVS Flexi streamlines unloading highly viscous liquids, offering **automation and high product-saving** efficiency.

With up to **99% product removal rate**, it's ideal for low to moderate volume applications like filling or packing lines.

Typical applications

» **Fruits & Vegetables** - tomato paste (concentrate), fruit pulp or base, sauce concentrate.

» **Syrups** - glucose syrup, maltose syrup, corn syrup, oat syrup, high-fructose corn syrup (HFCS).

» **Other food products** - caramel, peanut butter, almond paste, mayonnaise, nougat paste, chocolate.

» **Cosmetics & Pharma** - cosmetic and pharma vaseline, ointment, cream & lotion, semi-solid wax/paraffin, glycerine, oil, lip gloss, mascara, facial cleanser, facial mask.

» **Industry** - grease, including heavy duty Lithium-based NLGI class 3 grease, ink, paint, resin, coating and sealing compounds, mayonnaise, nougat paste, chocolate.

Features

- ✓ **Unloading of the drums at a quick pace**
up to 100 liters per minute depending on the liquid properties and discharge pressure.
- ✓ **Precision and ease of operation**
ideal to integrate with packing or filling lines.

- ✓ **99% product extraction**
product savings thanks to the applied scraping lid.
- ✓ **High process safety and time-saving benefits**
brought by the control system.
